

Material Handling Equipment *Update*

Naval Inventory Control Point Mechanicsburg

December 2000 Volume 2 Issue 2

MHE Conference

This year's MHE conference was held at FISC Pearl Harbor from 11-13 July 2000 and was attended by all the MHE regional representatives and Type Commanders. The conference provided an opportunity to review the program and offer new initiatives and/or recommendations to improve current processes. There were thirty-nine action items identified. Here is a sample of some that have already been completed:

- NAVICP-M has sent letter of endorsement to all regarding the acceptability of black oxide cylinders in lieu of chrome.

- DLA Ogden has provided detailed instructions for completing EMACS program #15 (satellite data in web version of EMACS). (Also can see page 2 for complete instructions)

- NAVICP-M provided guidance on the use of keyless ignition systems

- Resolved issue of training support for MHE.

- The Service Life Extension Program (SLEP) guide update has been completed and will be published during the second quarter of FY01.

Reports of Discrepancies

Mike Myers and Eric Fisler
NAVICP-M

If you receive a new piece of Material Handling Equipment (MHE) from the manufacturer that has quality problems, report the deficiency on a Standard Form 368 (SF368). Any problems reported during the warranty period will be repaired by the manufacturer's representative at no cost to the Navy.

The form is available under NSN 7640-00-133-5541. It can also be obtained electronically at various places on the Internet. One web address is www.web1.whs.osd.mil/icdhome/sfofform

Completed forms can be mailed to:

Commander, Attn: Code 058133, Naval Inventory Control Point, 5450 Carlisle Pike, P.O. Box 2020, Mechanicsburg, PA 17055-0788

Electronic versions of the form can be emailed to:

Michael_L_Myers@icpmeh.navy.mil or

Eric_E_Fisler@icpmeh.navy.mil

Tech Manual Discrepancies

MHE technical manual discrepancies (e.g. wrong part numbers/vendors, etc) are being reported verbally or by email in lieu of a QDR as required by NAVSUP PUB 538.

A draft Technical Manual Deficiencies/Evaluation Report (TMDER) was developed, presented and approved at the MHE conference in July 2000.

The TMDER will be provided by the manufacturers in their technical manuals for future procurements. It will also be addressed in the NAVSUP PUB 538 which is scheduled to be revised and updated during FY01.

A copy of the TMDER in a Microsoft Word format can be obtained by email from the PHST Center. Point of contact is Rich Sova, DSN 449-2841, comercial (732)866-2841, or email sovare@phst.navy.mil

EMACS Server at Pearl Harbor

The Fleet and Industrial Supply Center (FISC) Pearl Harbor now has its own local network server dedicated to the Equipment Management and Control System (EMACS). The new server stores MHE databases for Yokosuka and Pearl regions that contain electronic records for 1251 pieces of ashore and afloat MHE. The web-enabled Pearl EMACS site additionally offers password protected links to Navy EMACS sites in San Diego and Norfolk facilitating system-wide navigation and worldwide asset visibility in a single user session. Navy MHE owners in Yoko and Pearl regions can easily go online via the internet to input quarterly utilization and maintenance data to preclude hard copy reporting requirements. Web addresses, passwords, and training opportunities may be obtained through your local MHE regional managers.

Yokosuka manager is CM2 Armandariz, email cm2_hugo_armendariz@yoko.fisc.navy.mil

Pearl Harbor manager is Wayne Tsuda, email wayne_t_tsuda@pearl.fisc.navy.mil

Satellite Data Updates

The purpose of this program is to provide the capability to update maintenance and/or utilization information when the User Worksheet is completed.

Follow the steps below to update:

- SELECT program by entering program number, 15, or program name, satelmnt, at the prompt.
Press <Return> key
- ENTER organization code in the UIC/Org field
PRESS the <F3> key
All records will be found
- ENTER the Current Meter Reading.
PRESS the <return> key.
- ENTER the PM Hours for this reporting period.
PRESS the <Return> key
- ENTER the UM Hours for this reporting period
PRESS the <Return> key
- ENTER total EOS Hours for this reporting period.
PRESS the <Return> key
- ENTER the EDP Hours for this reporting period.
PRESS the <Return> key
- ENTER the Nonlabor Cost (this includes the total of labor and nonlabor costs).
PRESS the <Return> key
- ENTER the Date Released
PRESS the <Return> key.
Or if today's date,
PRESS the <Return> key
The next record for the organization will automatically display.
- RETURN to Step 3.
REPEAT for each additional record.
- When completed,
PRESS the <F1> key to return to the program selection screen.

MHE INSTRUCTION 10490.4

Procedures for the following are contained as enclosures to the recently revised MHE Instruction **10490.4 dated 17 March 1999:**

1. EMACS User Groups
2. Allowance Change Request Procedures
3. USN Registration Number for MHE
4. MHE QDR Process
5. Navy MHE Equipment Cost Codes/Descriptions

If your activity does not have a copy on file, you can obtain one from your NAVICP-M point of contact or your FISC regional manager:

Remember.....

In order to receive replacements:

1. Submit quarterly report (User Worksheets) to your respective FISC Regional Manager. NAVICP-M will utilize EMACS data to determine replacement requirements.
2. Submit timely response to NAVICP-M's annual Projected Replacement Requirements letter mailed mid-March to all Navy customers. If you do not receive your letter by 1 April 2001 please contact NAVICP-M or your FISC regional manager.

EXCESS MHE

Activities interested in obtaining excess units to fill new allowance requirements may consider excess MHE from another activity. Activities must contact their respective FISC regional manager who will then evaluate and forward their recommendation to NAVICP-M for approval. Units obtained from excess may be used in lieu of initial funding for a new unit(s) required by NAVICP-M Instruction 10490.4. Excess units will not qualify for replacement until an equivalent new equipment life cycle has elapsed.

Farewell to EO1 Littrell

As of December 2000, EO1 Rick Littrell will be replaced by Hugo Armendariz as the MHE FISC Yokosuka Regional Manager. HM2 Armendariz can be reached at 011-81-311-743-8363 or email cm2_hugo_armendariz@yoko.fisc.navy.mil. We would like to wish EO1 Littrell all the best and thank him for a job well done.
